

ABOUT THE AUTHOR

Lisa Black spent the happiest five years of her life in a morgue. Strange, perhaps, but true. After ten years as a secretary, she went back to school to get a Bachelor's degree in Biology from Cleveland State University. In her job as a forensic scientist at the Cuyahoga County Coroner's Office, she analyzed gunshot residue on hands and clothing, hairs, fibers, paint, glass, DNA, blood and many other forms of trace evidence, as well as crime scenes.

She had her life sorted out just the way she liked it until her husband got fed up with Cleveland snow and moved them to Florida, 1400 miles away from her family and her career. Not that she's bitter or anything. Now she works as a latent print examiner for the city of Cape Coral, Florida, police department, working mostly with fingerprints and crime scenes.

Lisa has lectured at writer's conventions and appeared on panels. In her life as a writer she's a member of Sisters In Crime, Mystery Writers of America and International Thriller Writers. In her life as a forensic specialist she's a member of the American Academy of Forensic Scientists, the International Association for Identification, the International Association of Bloodstain Pattern Analysts and is certified by the American Board of Criminalistics. She has had over 741 hours of instruction in forensic topics and has testified in over 50 trials.
